Miles Chemical Enhances Technical Support Capabilities

As part of an ongoing investment to strengthen their customer and supplier technical support Miles Chemical is pleased to announce the following additions:

Denis Mikitchook and Cesar Vega have joined Miles Chemical as Technical Service Representatives. They will be providing technical support for the Metal Finishing, Printed Circuit Board, and Environmental (waste and water treatment) industries. They will be working closely with Miles customers to insure processes are running efficiently and to assist in trouble shooting and technology implementation.

“Denis brings very strong process experience to Miles Chemical” stated Anthony Miles, President of Miles Chemical. “Having been an operations and quality manager Dennis has a real strong background with Electroless Nickel, Anodizing and other functional processes”.

“With his background in Job Shops, Cesar also brings some great hands on experience working a multitude of processes including copper, chrome, zinc and nickel”. Anthony Miles went on to state

In Miles Chemical Analytical Laboratory, located in Anaheim California, Phillip King has joined the company as Lab Manager. “Phil brings over 21 years of laboratory experience in both chemical and waste processes. In addition we have purchased an Auto titrator that will enhance the accuracy and efficiency of our wet analysis capabilities”

Miles went on to state “These additions and enhancements gives us some real technical synergies that are all local and available to our customers.”

ABOUT MILES CHEMICAL

A privately owned corporation, Miles Chemicals was established in 1996 and currently has 2 facilities in Arleta and Anaheim California. Miles Chemical provides Distribution services Custom Blending, Waste Services, and Inventory Management as part of its overall offerings. Miles Chemical provides just-in-time delivery of chemicals with their own fleet of trucks to its customers in the metal manufacturing, surface finishing, printed circuit board, industrial, food, personal care, nutraceutical, and municipal industries.
